Subject: RE: December 13 Technical Meeting

Hi Lynda,

Has there been a call-in number circulated yet for the December 13 meeting at the AMECFW Office? If so, can I get it?

Douglas Carey, P.G.

Senior Engineering Geologist

Leviathan Mine

Regional Water Quality Control Board, Lahontan Region

2501 Lake Tahoe Blvd.

South Lake Tahoe, CA 96150

(530) 542-5468

Subject: RE: December 13 Technical Meeting

Please note my change in agenda.

We will start earlier on the technical items. And after lunch,

Legal counsel for the topic at 1:30 is welcome/ appreciated.

Subject: RE: December 13 Technical Meeting

Hi Lynda, the AMECFW Office in Sacramento is fine. I will contact Adam and let him know that Josh will not be attending so AR counsel is not required to be present.

Marc, request AMECFW address the request regarding the subject TDSR. T...

Subject: FW: December 13 Technical Meeting

Hello Tony/Marc,

I noted that Adam recently provided an rsvp to our upcoming “technical” meeting scheduled for December 13th.

I’d like to request that we do keep these as technical meetings, and not include legal/lawyers. Would that be okay?

This is really the presentation by ARC of the next Technical Data Summary report, for the next media. In this case: Sediment and floodplain.

Also, we originally discussed having this at the Waterboard office or SF. I’d like to confirm that we’d like to hold this at the AMEC office.

Also, I realized that my email wasn’t clear and specific. EPA requests that ARC will provide the sediment and floodplain TDSR in advance of the meeting or by Thursday December 8, 2016

Lynda

Subject: December 13 Technical Meeting

Dear Mr. Brown,

EPA looks forward to our next technical meeting. Here is a proposed agenda and logistics. EPA anticipates that ARC will provide a Technical Data Summary Report (TDSR) on Sediment and Floodplain soils in advance of the meeting. Preferably 72 hours in advance.

- DURATION: Let's plan for the full day: 10 am to 4pm. Confirm location is it Waterboard or AMEC office?
- WEBINAR: Please set up a webinar for those who can't attend the whole meeting
- AGENDA: Here is a draft. EPA looks forward to a review and discussion of the following items:

DRAFT AGENDA

Introductions

Safety Moment

Stream Sediment

Available data (QCSR and DQA)

Stream Profiles

Screening benchmark comparisons (risk assessment calculations)

Reference Comparison

Elevated risks attributable to the site;

Implications for the FS

Floodplain Soil

Available data (QCSR and DQA)

Stream Profiles

Screening benchmark comparisons (risk assessment calculations)

Reference Comparison

Elevated risks attributable to the site;

Implications for the FS

Field work remaining in 2017; this and other media

Wrap up/ Next steps

EPA would like to note that at Leviathan, Stream Sediment is defined as the active sediment in the upper two centimeters of the stream channel. Deeper or more stationary sediment is classified as floodplain soil. The discussion at our meeting, and the data in the TDSR should include both stream sediment and floodplain soil as they are defined at Leviathan.
